### **DETAILED ACTION**

1. Upon further consideration, an election of species requirement is being made as set forth below:

#### ***Election/Restrictions***

2. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

**1) Figs. 1a, 1b, 2) Figs. 2a, 2b, 3) Figs. 3a, 3b, 4) Fig. 4, 5) Fig. 5, 6) Fig. 6, Figs. 7a, 7b, 7c, 8) Fig. 9, 9) Fig. 10, 10) Fig. 11, and 11) Fig. 12**

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims

Art Unit: 3723

are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

The following claim(s) are generic: Claim 1 appears to be generic, for example.

3. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: The special technical feature in all groups/species is a cleaning arrangement including a case, a brush provided in the case, and a liquid retaining member in the case. This element is not deemed a special technical feature among the groups because these elements are taught in the prior art. U.S. Patent No. 3,135,987 to Huch teaches in Figs. 3 and 4 a cleaning arrangement including a case 8, a brush 26 provided in the case, and a liquid retaining member 42 in the case (col. 2, lines 68-71 and col. 3, lines 13-18). The recitation of cleaning earwax from a hearing aid merely involves intended use. Therefore, there is a lack of unity because there is not a corresponding special technical feature that defines a contribution over the prior art.
